

Paula Goss Distance & Discrimination/Handling Seminar

June 2 and 3, 2012 – (8:30 – 4:00)

Paula comes from a competitive horseback riding background, which led very easily into dog agility. She has been involved in competitive agility for 20 years. She began her Labrador and Border Collie, and currently competes with her two border collies Trae and Tessie. She has been ranked in NADAC's Top 10 for the past 8 years, earned over 18 NATCHs and MEDAL's, over 10 platinum speed star awards, and attended numerous championships winning with her border collie, Split in 2005, 2007; and with Trae in 2009. Trae and Paula are also one of only 13 teams in the country to have earned the prestigious MOD SQUAD award. Her students are consistently in NADAC's Top 10 as well as the NADAC Championships and various Breed Specialties.

Paula is incredibly motivational and her experience and positive upbeat attitude makes her a pleasure to work with. These is so much that contributes to the success of a performance team and her seminars break down processes to find out what works for each individual team. Paula teaches seminars across the US and Canada as well as being a NADAC Clinician. She returns to PA to offer us two great days of training!

This seminar will focus on developing and improving distance skills and teaching discriminations/handling skills. Paula will cover pre-cueing, efficient path work, directional, discriminations, improving obstacle performances, distance work, and anything else she feels you might benefit from.

The June seminar will build on the January seminar, but you need not sign up for both seminars. Open/Excellent will be held on Saturday and Novice/Beginner will be held on Sunday.

Limit each day is 10 teams. \$75.00 per team per day \$35.00 per auditor
